

Members have a dashboard to give them access to features such as discussion forums, Conduct, personal calendars, or content directories. Portals can have different member dashboards for each member type.

## Member Dashboard

### Personal Calendar

Each member has a personal calendar with events added on the site, events added by administrators or events added by the member. Add events to a member calendar and set up text reminders and check-ins.

### Discussion Forums

Link to a discussion forum from the member dashboards. Forums can be restricted to specific member types and managed by a site administrator.

### Conduct Campaigns

Link to Conduct from the member dashboards. Conduct is email marketing technology where campaigns are added by site administrators or members.

### File Library

Administrators can send a file delivered to all members or a file delivered to a specific members. Files can be uploaded in a batch and automatically delivered to multiple members.

### Directories & Content

Create a content or catalog directory and add a link to it in the dashboard. Bookmark content or subscribe to a catalog newsfeed.

### Activity Reports

Members can use a report to track their activity.

### Directory Sections

Add banners, text & graphics, post directories and tiles as sections and position them on the dashboard to create a custom look.
